### Charging the Mini DVR

- 1. Ensure the battery and required Micro SD® card are fitted in to the Mini DVR.
- 2. Turn the PC on.
- Connect the Mini DVR to the USB socket of a PC using the supplied cable. Do not use extension cables or USB hubs as the Mini DVR may not communicate correctly with the PC. Ensure the USB cable is pushed firmly into both sockets.
- 4. No drivers should be required in order to access the files on the Micro SD® card, locate the drive and drag and drop files into the required directory.
- 5. Delete the files stored on the Micro SD® card to free space for further recordings and unplug USB cable once communications complete.

Do not format the Micro SD® card on the PC.

Do not disconnect the USB cable or change Micro SD® card when the Mini DVR is communicating with the PC. If the cable is disconnected during communication data loss will be caused.

**Safety Information** 

To avoid damage, disassemble sections with a twisting motion.

Do not use near over head cables.

Do not use during electrical storms. To avoid damage do not use during strong winds.

Use the supplied shower protector with the Mini DVR during use outside.

Please observe the safety information provided in the TC 7 operating manual to avoid injury, loss of life and damaged equipment.
